

raymond.luk@naaapsf.org

Raymond is Director of Technology for NAAAP-SF. In this role, he is responsible for developing and maintaining the NAAAP SF website and other IT related developments.

Raymond was part of the event planning team during NAAAP 2008 National Convention. Since then, he has been an active member of NAAAP. Raymond will also sit on the Technology Committee for the NAAAP 2009 National Convention.

Raymond is currently a Software Engineer at Medallia, developing enterprise survey engine for top companies in their fields such as Hilton, Apple, and Fidelity. Prior to Medallia, Raymond was an engineer in TeleNav developing real time navigation system for US and China.

Raymond earned his B.S. degree at UC Berkeley and a Master's degree in Software Engineering from Carnegie Mellon University. He enjoys trying out different cuisines, watching different genres of films, and traveling.
